

Specialists in composite doors

 **permadoor**[®]

25 years of experience

Permadoor is the original manufacturer of composite doors and we celebrated 25 years in business in 2014.

We have worked with local authorities, housing association registered providers, contractors and consortia since we were founded. Our experience means we have an in-depth knowledge of the opportunities and challenges you face and are able to provide the products, information and support you need to complete every project successfully.

25 years of innovation

We are proud to be leaders in innovation. In the past few years alone, pioneering product developments include being the first company to use recycled composite material as frame reinforcement, the first to introduce a 100% recycled door frame and the first to develop a fully compliant FD60 GRP fire door.

These developments help us remain at the forefront of our industry. More importantly, they help you to drive improvements in your sector.

25 years of improvement

Throughout our 25 years in business we have had a policy of continuous improvement. We invest in staff development training and technological advances such as computerised systems and CNC systems.

Our investment means we are a company you can rely on to deliver industry-leading products and service.

A member of the Epwin Group

As a member of the Epwin Group we can give you the additional reassurance of being part of a company that employs over 2,400 people and has an annual turnover in excess of £265 million.

Working with Permadoor

We recognise that to be a valuable partner we need to offer product and service excellence. Our aim is to provide a package that provides everything you need to ensure your contract runs smoothly from specification to completion.

Bespoke solutions

We offer a comprehensive range of hardware, glass, cill, sidelight and toplight options designed to suit all housing styles and tastes. We are also always happy to work with you to develop solutions to meet particular requirements.

Contract management service

Permadoor offers a comprehensive contract management service, from initial enquiry through to after sales support. Our Contract Management team will take all the risk out of your door supply or replacement needs.

1 Initial enquiry

We provide nationwide technical sales support to ensure that you have access to the best possible advice at all times.

2 Quotation

Our team of estimators provide comprehensive quotations to specification and are happy to help you with any queries.

3 Supply, fit and site management service

We offer a full end-to-end service including surveying, client liaison, manufacture, delivery, installation and site management.

4 Resident support

Resident choice forms can be provided to involve residents in the selection of door styles, colours and glazing. In addition, we will attend resident meetings if required – managing the complete selection process on your behalf.

5 Health and Safety

Our installation service includes full site management. Industry-leading training and planning ensure that all risks are assessed and everyone remains safe.

6 Installation

If preferred, we can supply only. We will deliver our doors with full installation instructions and provide the technical advice you need.

7 Fast track replacements

Made to measure fast track replacement doors are available.

8 UK manufacture

Our UK manufacturing operation uses advanced planning and production systems to meet your requirements on schedule. We are committed to providing high quality products and services within our BSI certified quality systems, so every door is checked throughout production and signed off by an experienced inspector.

9 UK distribution

Our computerised distribution system enables us to track doors all the way to site. All doors are labelled with site location and specification with a barcode for identification and traceability.

Accreditations

As one of the UK's leading door manufacturers working in the public and commercial contract sectors, our company and its products have a wealth of accreditations that allow you to fulfil your project specifications.

CHAS – the scheme assesses a company's health and safety policy statement in order to comply with onsite regulations.

Association of Composite Door Manufacturers

SAFE CONTRACTOR – an accreditation scheme that assesses the health and safety competency of contractors and service providers.

SECURED BY DESIGN – the initiative launched by the police to ensure high standards of crime prevention measures.

SSIP – Safety Schemes in Procurement.

PAS 24

PAS 24 – the testing and assessing of general performance and enhanced security performance of door assemblies to dwellings.

EXOR – provides an efficient, outsourced supply chain to central/local government, housing associations, private and public sector organisations.

ISO 9001 – ensures consistency and improvement of all our working procedures to ensure our products and services are class leading.

CONSTRUCTIONLINE – is the largest online database for pre-qualified contractors and consultants.

ISO 14001 – continuous improvement and operation of an environmental management system.

BM TRADA – is a leading certification body accredited by UKAS.

OHSAS 18001 – our strict health and safety policy ensures compliance across our operations.

FENSA – allows companies to self certify that their installations comply with current building regulations.

CE Marking – All non-fire rated doors are CE marked.

Environmental considerations

As holders of the BS EN ISO 14001 accreditation, you can be sure that our actions have minimal environmental impact on local communities.

100% commitment to sustainability

We offer a comprehensive range of hardware, glass, cill, side and toplight options designed to suit all housing styles and tastes. We are also always happy to work with you to develop solutions to meet particular requirements.

Recycling

Our recycling chain from collection to reprocessing is designed to substantially reduce our products' carbon footprint. We have an active recycling programme that covers aluminium, polythene and cardboard. Our PVC-U waste is reprocessed within the Epwin Group and used within the Group's facilities, closing the loop on the recycling process.

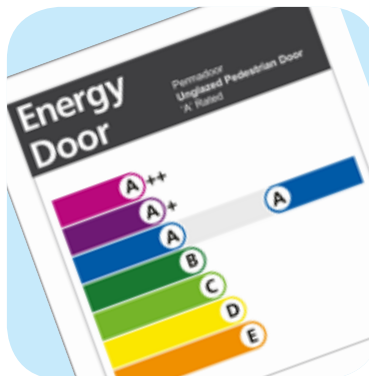

Energy efficient doors

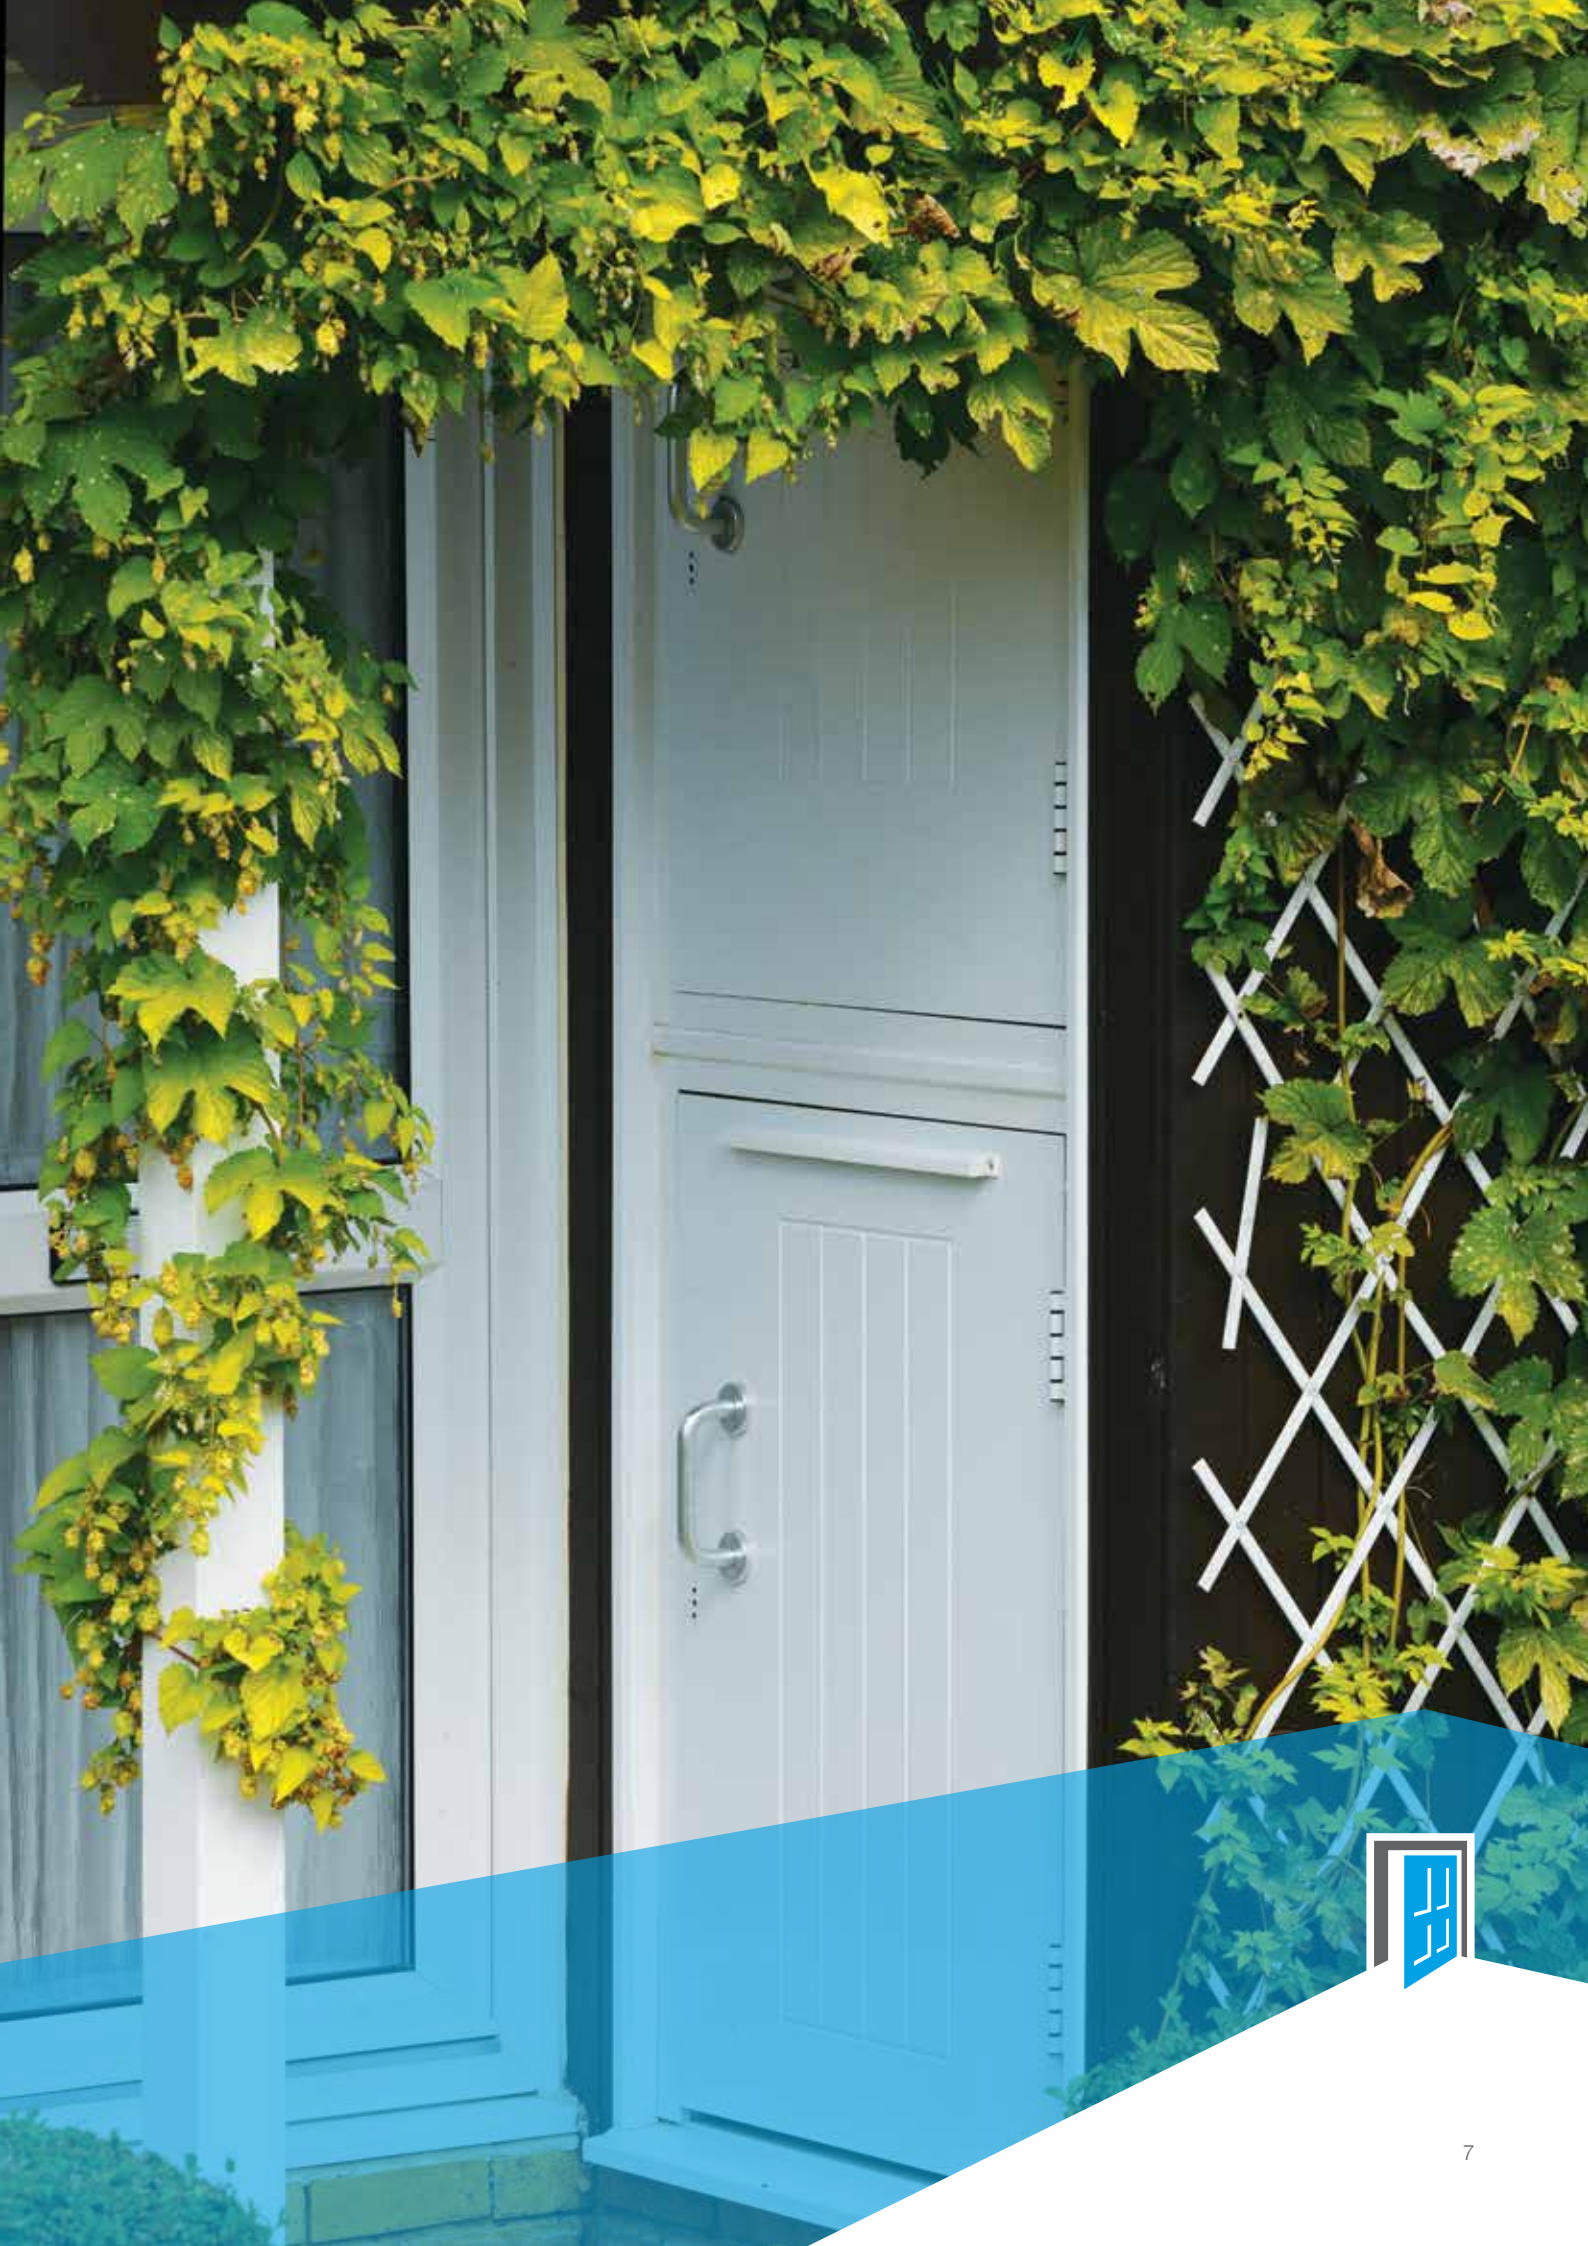

Nine of our GRP doors have been rated 'A' in the British Fenestration Rating Council door energy rating scheme.

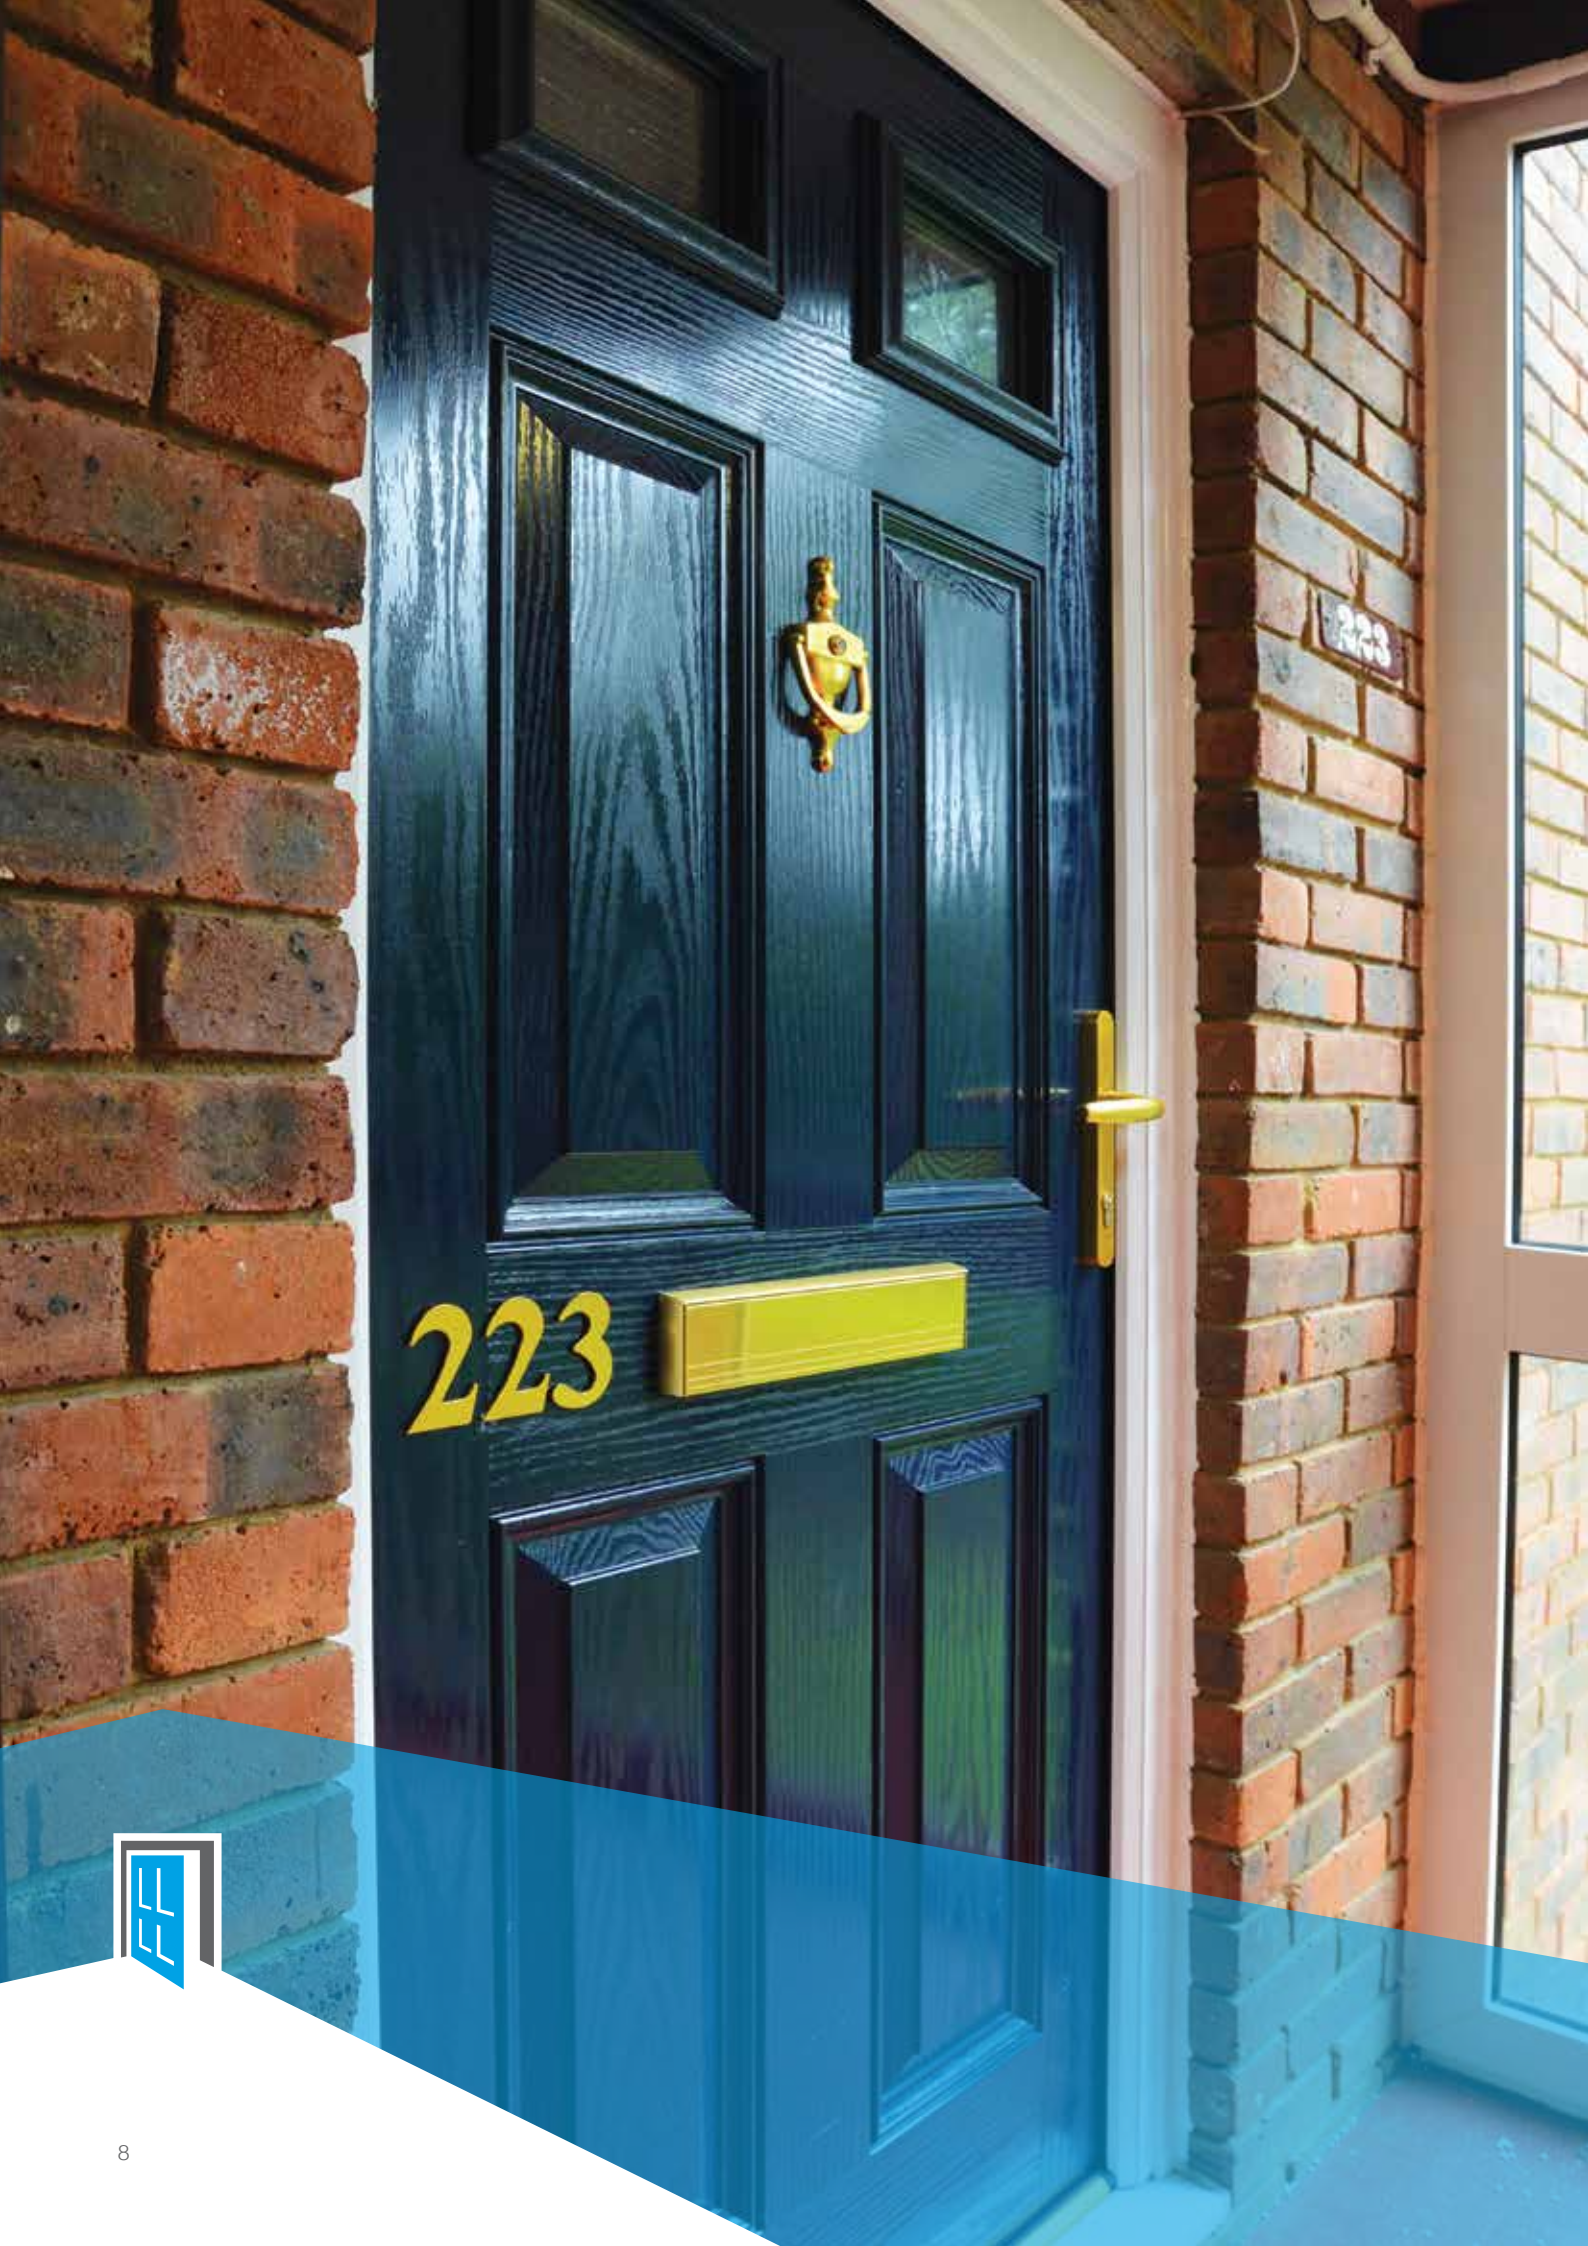

Eco options

Permadoor doors can have a U-value as low as 0.7w/mk. We also offer a range of options that help to boost the environmental credentials of any project:

Epwin Group

Permadoor is one of the 30 companies that comprise the Epwin Group. Our membership gives us access to a wealth of related products and services that enable us to provide a wide-ranging service to our customers.

Founded in 1976, the Epwin Group has grown and developed both organically and by acquisition over the last 38 years. It now employs over 2000 people with approximately 1.2 million sq.ft of production and warehousing space and has an annual turnover of £265m. In 2014 the Epwin was listed on the London Stock Exchange AIM listing signalling a new era for the low maintenance building products Group.
